

Welcome to the PIA for FY 2010!

Congress passed the E-Government Act of 2002 to encourage the use of Web-based Internet applications or other information technology by Government agencies, with the intention of enhancing access to government information and services and increasing the effectiveness, efficiency, and quality of government operations.

To combat public concerns regarding the disclosure of private information, the E-Government Act mandated various measures, including the requirement that Federal agencies conduct a Privacy Impact Assessment (PIA) for projects with information technology systems that collect, maintain, and/or disseminate "personally identifiable information" of the public. Personally identifiable information, or "personal information," is information that may be used to identify a specific person.

The Privacy Act and VA policy require that personally identifiable information only be used for the purpose(s) for which it was collected, unless consent (opt-in) is granted. Individuals must be provided an opportunity to provide consent for any secondary use of information, such as use of collected information for marketing.

Directions:

VA 6508 is the directive which outlines the PIA requirement for every System/Application/Program. More information can be found by reading VA 6508.

If you find that you can't click on checkboxes, make sure that you are: 1) Not in "design mode" and 2) you have enabled macros.

Roles and Responsibilities:

Roles and responsibilities for the specific process are clearly defined for all levels of staff in the Privacy Impact Assessment Handbook 6202.2 referenced in the procedure section of this document.

- a. The Privacy Officer is responsible for the overall coordination and review of the PIA to ensure compliance with VA Handbook 6202.2.
- b. Records Officer is responsible for supplying records retention and deletion schedules.
- c. Information Technology (IT) staff responsible for the privacy of the system data will perform a PIA in accordance with VA Handbook 6202.2 and to immediately report all anomalies to the Privacy Service and appropriate management chain.
- d. Information Security Officer (ISO) is responsible for assisting the Privacy Officer and providing information regarding security controls.
- e. The CIO is responsible for ensuring that the systems under his or her jurisdiction undergo a PIA. This responsibility includes identifying the IT systems; coordinating with the Privacy Officer, Information Security Officer, and others who have concerns about privacy and security issues; and

systems, coordinating with the Privacy Officer, Information Security Officer, and others who have concerns about privacy and security issues, and reviewing and approving the PIA before submission to the Privacy Service.

Definition of PII (Personally Identifiable Information)

Information in identifiable form that is collected and stored in the system that either directly identifies an individual by name, address, social security number, telephone number, e-mail address, biometric identifiers, photograph, or other unique numbers, codes or characteristics or combined, indirectly identify an individual such as a combination of gender, race, birth date, geographical indicators, license number is also considered PII.

Macros Must Be Enabled on This Form

To enable macros, go to: 1) Tools > Macros > Security - Set to Medium; 2) Click OK; 3) Close the file and when reopening click on Enable Macros at the prompt.

The controls are being considered for the project based on the selections from the previous assessments?
The minimum security requirements for our high impact system cover seventeen security-related areas with regard to protecting the confidentiality, integrity, and availability of VA information systems and the information processed, stored, and transmitted by those systems. The security-related areas include: access control; awareness and training; audit and accountability; certification, accreditation, and security assessments; configuration management; contingency planning; identification and authentication; incident response; maintenance; media protection; physical and environmental protection; planning; personnel security; risk assessment; systems and services acquisition; system and communications protection; and system and information integrity. Our facility employs all security controls in the respective high impact security control baseline unless specific exceptions have been allowed based on the tailoring guidance provided in NIST Special Publication 800-53 and specific VA directives.
